H.2 The Contractor agrees that said work shall be executed regularly, diligently, and uninterruptedly at such rate of progress as will insure full completion thereof within the time specified. It is expressly understood and agreed, by and between the Contractor and the City, that the time for the completion of the work described herein is a reasonable time for the completion of the same, taking into consideration the average climatic range and usual industrial conditions prevailing in this locality. If the said Contractor shall neglect, fail or refuse to complete the work within the time herein specified, or any proper extension thereof granted by the City, then the Contractor does hereby agree, as a part consideration for the awarding of this contract, to pay to the City the amount of \$250.00 per day, not as a penalty but as liquidated damages for such breach of contract as hereinafter set forth, for each and every calendar day that the Contractor shall be in default after the time stipulated in the contract for completing the work.

J.2 In preparing estimates, the material delivered on the site and preparatory work done may be taken into consideration.

J.3 All material and work covered by partial payments made shall thereupon become the sole property of the City, but this provision shall not be construed as relieving the Contractor from the sole responsibility for the care and protection of materials and work upon which payments have been made or the restoration of any damaged work, or as a waiver of the right of the City to require the fulfillment of all of the terms of the contract.

J.4 City's Right to Withhold Certain Amounts and Make Application Thereof; The Contractor agrees that he will indemnify and save the City harmless from all claims growing out of the lawful demands of subcontractors, laborers, workmen, mechanics, aterialmen, and furnishers of machinery and parts thereof, equipment, power tools, and supplies, including commissary, incurred in the furtherance of the performance of this contract. The contractor shall, at the City's request, furnish satisfactory evidence that all obligations of the nature hereinabove designated have been paid, discharged, or waived. If the Contractor fails so to do, then the City may, after having served written notice on the said Contractor, either pay unpaid bills, of which the City has written notice, direct, or withhold from the Contractor's unpaid compensation a sum of money deemed reasonably sufficient to pay any and all such lawful claims until satisfactory evidence is furnished that all liabilities have been fully discharged whereupon payment to the Contractor shall be resumed, in accordance with the terms of this contract, but in no event shall the provisions of this sentence be construed to impose any obligations upon the City to either the Contractor or his Surety. In paying any unpaid bills of the Contractor, the City shall be deemed the agent of the Contractor, and any payment so made by the City shall be considered as a payment made under the contract by the City to the Contractor and the City shall not be liable to the Contractor for any such payments made in good faith.

K. PAYMENTS BY CONTRACTOR

K.1 The Contractor shall pay (a) for all transportation and utility services not later than the 20th day of the calendar month following that in which services are rendered, (b) for all materials, tools, and other expendable equipment to the extent of ninety percent (90%) of the cost thereof, not later than the 20th day of the calendar month following that in which such materials, tools, and equipment are delivered at the site of the project, and the balance of the cost thereof, not later than the 30th day following the completion of that part of the work in or on which such materials, tools, and equipment are incorporation or used, and (c) to each of his subcontractors, not later than the 5th day following each payment to the Contractor, the respective amounts allowed the Contractor on account of the work performed by his subcontractors to the extent of each subcontractor's interest therein.

CONCRETE REPLACEMENT PROJECT
 Sealed Bid #: FY2020-08-010

L.2 The Contractor shall not award any work to any subcontractor without prior written approval of the City, which approval will not be given until the Contractor submits to the City a written statement concerning the proposed award to the subcontractor, which statement shall contain such information as the City may require.

L.3 The Contractor shall be as fully responsible to the City for the acts and omissions of his subcontractors, and of persons either directly or indirectly employed by them, as he is for the acts and omissions of persons directly employed by him.

L.4 The Contractor shall cause appropriate provisions to be inserted in all subcontracts relative to the work to bind subcontractors to the Contractor by the terms of the General Conditions and other contract documents insofar as applicable to the work of subcontractors and to give the Contractor the same power as regards terminating any subcontract that the City may exercise over the Contractor under any provision of the contract documents.

L.5 Nothing contained in this contract shall create any contractual relation between any subcontractor and the City.

M. FINAL ACCEPTANCE AND WARRANTY PERIOD

M.1 The acceptance by the Contractor of final payment shall be and shall operate as a release to the City of all claims and all liability to the Contractor for all things done or furnished in connection with the Work and shall constitute the beginning of the warranty period.

No payment, however, final or otherwise shall operate to release the Contractor or his sureties from any obligations under this contract or the Performance and Payment Bond. The Contractor shall remedy any defects in work and repair any damage to other work resulting therefrom which shall appear within a period of one (1) year from the date of final written approval and acceptance. The City shall give notice of observed defects with reasonable promptness. The surety will provide bond at one half of project amount until the end of the one year warranty period. The Technical Specifications can be downloaded for free from the City of Bartlett website at <https://www.cityofbartlett.org/documentcenter/view/3875>.
- Contact the City of Bartlett Engineering Office and the City Construction Inspector at 901-385-6499 **prior** to beginning any construction activity and if any plan changes are necessary due to the field conditions. Any proposed changes shall require approval before work is commenced.
- The bid price for each work item shall include all equipment, material and labor to complete each item and shall include the removal of the existing item to be replaced, including the removal and reinstallation of sod along the work item. The City of Bartlett will be responsible for the replacement of asphalt that may have to be removed by this work request.
- The Contractor shall be responsible for obtaining any and all permits from the City of Bartlett Code Enforcement office for the proposed work. **Note:** This will be a **NO** cost permit and must be obtained **prior** to start of project.
- The contractor will be responsible for coordinating the work and inspection with the City of Bartlett Department of Engineering (385-6499), and will be required to install the items according to our Standard Details and Specifications. Details and Specifications are available in this document or in the Engineering Office at 6382 Stage Road, Bartlett, TN 38134.
- All work on this contract is to be performed in the neighborhood bounded by Highway 70 (Summer) to the west, Memphis Arlington to the north, Germantown Road on the east, and Claredale to the south. Item Descriptions

1. Curb and Gutter (see attached detail SCS-1):

The contractor is to saw-cut, remove and replace all damaged 6" x 30" curb and gutter As requested by the Engineering Department and as marked or painted by the city, and shall match the size and dimensions of the adjoining surfaces. Any disturbed sod shall be replaced with new Bermuda sod unless existing sod is reused and will fully restore the disturbed area. Asphalt repairs between the new curb and old asphalt will be performed by the City. However, the contractor shall be responsible for keeping this damage to a minimum. Any damage to the asphalt roadway shall be saw-cut by the contractor so there is a clean edge for asphalt repair by others. Any locations where the existing curb is taller than the standard 6" curb, new 6" curb will be installed and taper at a slope of 1:12 to meet the adjoining curb. All sewer and water lines running beneath the replaced section shall be marked with an engraved 4" high 'S' or 'W' on the face of curb at the appropriate location. Only the curb and gutter located outside of the ramp area will be paid as per linear foot. Any curb and gutter existing or new must be separated from ramp with expansion joint material. Any new curb and gutter constructed beside a street drain inlet must have an expansion joint within five feet of either side of the drain inlet.
Estimated quantity: 4,791 LF. Bid quantity: 4,850 LF.

CONCRETE REPLACEMENT PROJECT

Sealed Bid #: FY2020-08-010

Due Date: August 22, 2019

2. Remove and Replace Sidewalk (SCS-8):

Damaged sidewalk will be saw-cut, removed and replaced as marked. Sidewalk adjoining all 10' new and retrofit handicap ramps to the ERs are included in the price of handicap ramp as shown on the handicap ramp details. If a sidewalk block is partially damaged, the entire block of sidewalk may be replaced rather than cutting and replacing a portion of the damaged block, as directed by the City of Bartlett. Sidewalk inside the driveway apron area will be paid for as driveway apron because this sidewalk is thicker, 6" thick, and more difficult to remove than regular sidewalk. **Estimated quantity: 104 LF, Bid quantity: 125 LF.**

3. Driveway Gutter:

If any address requires new curb and gutter in front of the driveway apron, and the apron is in good condition, the driveway gutter may be replaced by either saw-cutting the gutter below the front edge of the apron lip or by saw-cutting the apron in line with the back of curb and replacing the gutter and lip of the driveway with an expansion joint between the new gutter and the old driveway apron. Any such locations will require a waiver (**RL-1, page 19 of this document**) from the property owner holding the City of Bartlett and the contractor harmless for replacement of the drive apron or future damage to the remaining driveway apron. The contractor shall exercise extreme caution to not damage the remaining driveway and if the contractor determines that any requested location is a poor candidate for this type of repair, contractor shall make the engineering inspector aware, so the homeowner may be notified. A photo of each driveway gutter location will be taken prior to saw-cutting and any cracks or chips caused by the removal and replacement shall be repaired by the contractor, at his/her expense according to Code Enforcement standards for caulking cracks and minor repairs. However the contractor is NOT responsible for replacing the entire apron if cracks or chips occur. All incidentals to complete this work are included in the unit price including saw-cutting, removal, installation, joint material, sod, caulk, etc. This item is paid for by the Linear Foot. If the driveway gutter can be replaced without cutting the driveway (i.e. (1) if the entire drive apron is going to be removed and replaced, (2) or if a joint between gutter and apron already exists, etc.) the drive gutter will be considered curb and gutter and paid for under that item. **Estimated quantity: 497 LF, Bid quantity: 515 LF**

4. Detectable Warning Surface:

Required on all handicap ramps. Detectable surface must match the width of the ramp and extend 2' from the back of the curb into the ramp area. It shall be truncated dome surface, meeting the latest edition of ADA and ANSI requirements. Color shall be brick red or approved equal. Surface shall be surface mounted mat (current approved is UltraTech (UT-0761) from CP Lab Safety) or approved equal. Price for a detectable warning mat is based on a standard 4'x2' mat. **Estimated and bid quantity: 55**

5. Water Table Repair:

A portion or all of damaged 8" Water Table will be replaced according to Concrete Water Table Detail (SCS-9). Water Table is paid by square foot of concrete replaced, but the bid item includes removal, replacement, and traffic control necessary. Any saw-cutting needed to remove a portion of the water table will be paid for separately as Saw-Cutting (6" to 8").

Estimated quantity: 457 SF, Bid quantity: 475 SF.

CONCRETE REPLACEMENT PROJECT

Sealed Bid #: FY2020-08-010

Due Date: August 22, 2019

6. Handicap Curb Cuts (see attached details SCS-2, SCS-3, SCS-4, SCS-5, SCS-6, and SCS-7):

The contractor is to saw-cut, remove and replace the entire handicap curb cut, as marked or painted by the city, and as described below, and shall match the size and dimensions of the adjoining surfaces. Contractor will be responsible for replacing all curb and gutter in front of the new ramps as part of the payment for the ramp. Curb and Gutter adjacent to a handicap ramp shall be poured monolithically with new handicap ramp with expansion joints at each end of handicap ramp and must have a scored joint in line with the back of the curb across the full width of the handicap ramp so each can be replaced in the future without damaging the other. Additional curb and gutter near the handicap ramps but outside the area in front of the ramp will be paid for as curb and gutter. All Ramps shall have an expansion joint placed between the ramp and adjacent sidewalk. All ramps shall have a detectable warning surface beginning adjacent to the back of the curb and extending 2' into the ramp. The warning surface shall match the width of the ramp. Seven types of Handicap Ramps are included in this bid document. Payment will not be made for any ramp items until the entire ramp, including truncated dome surface is complete.

- The contractor shall use the sod removed, where possible. If necessary, new sod will be required in any disturbed area. The cost of this sod work, new and/or reusing the existing sod, shall be incidental to other bid items and will not be paid for separately. If the existing sidewalk is less than 5' wide, the new ramp and 5' wide sidewalk will taper into the narrower existing sidewalk. If the existing sidewalk is greater than 5' wide, the new ramp and sidewalk will be as wide as existing. If coping walls are required during the installation of any ramp, it will be paid for separately from the ramp. See ramp details for additional notes:
 - a. 5' Minimum Handicap Ramp (approx. 90 SF) – These ramps will be installed at corners where there is an existing obstruction inside the 10' right of way. The 4' opening of this ramp slopes at 1:12 for a minimum of 2' as required by existing conditions. There will be a 3' level (1.5%) landing behind the sloped ramp section. The adjoining sidewalk will slope into the 4' opening at 1:12. The unit price for this ramp shall include all curb and gutter and sidewalk inside the ramp area. See the 5' Handicap Ramp Detail SCS-2. **Estimated and bid quantity: 4.333 (a portion of one ramp is included).**
 - b. 10' New Construction with Coping Handicap Ramp (approx... 165 SF) – New Construction or where the existing sidewalk is NOT adjacent to the curb and gutter. This ramp will extend 10' from the face of the curb to the back of the new coping wall. The adjoining sidewalk shall be removed as shown on the detail SCS-3 and replaced to tie into the back 5' of the ramp, in front of the coping wall. The unit price for this ramp shall include all curb and gutter inside the ramp area as well as all of the sidewalk on each side of the ramp to the ERs and any sod necessary to install the ramp according to this and the 10' Handicap Ramp Detail (SCS-3). **Estimated and bid quantity: 4.**
 - c. 10' New Construction Handicap Ramp (approx... 165 SF) – New Construction or where the existing sidewalk is NOT adjacent to the curb and gutter. This ramp will extend 10' from the face of the curb to the back of the new ramp. The adjoining sidewalk shall be removed as shown on the detail SCS-4 and replaced to tie into the back 5' of the ramp. The unit price for this ramp shall include all curb and gutter inside the ramp area as well as all of the sidewalk on each side of the ramp to the ERs and any sod necessary to install the ramp according to this and the 10' Handicap Ramp Detail (SCS-4). **Estimated and bid quantity: 22**

Due Date: August 22, 2019

- d. 10' Retrofit with Coping Handicap Ramp (approx.. 165 SF) – This ramp will extend 10' from the face of the curb to the back of the new coping wall. The adjoining sidewalk shall be removed as shown on the detail SCS-5 and replaced to tie into the back 5' of the ramp, in front of the new coping wall. If the adjoining sidewalk is located directly behind the curb with no grass strip separation, the sidewalk will curve within the 10' ROW from the flat back area of the ramp to the existing sidewalk. The unit price for this ramp shall include all curb and gutter inside the ramp area as well as all of the sidewalk on each side of the ramp to the ERs and any sod necessary to install the ramp according to this and the 10' Handicap Ramp Detail (SCS-5). **Estimated and bid quantity: 7.**
- e. 10' Retrofit Handicap Ramp (approx.. 165 SF)– This ramp will extend 10' from the face of the curb to the back of the new ramp. The adjoining sidewalk shall be removed as shown on the detail SCS-6 and replaced to tie into the back 5' of the ramp. If the adjoining sidewalk is located directly behind the curb with no grass strip separation, the sidewalk will curve within the 10' ROW from the flat back area of the ramp to the existing sidewalk. The unit price for this ramp shall include all curb and gutter inside the ramp area as well as all of the sidewalk on each side of the ramp to the ERs and any sod necessary to install the ramp according to this and the 10' Handicap Ramp Detail (SCS-6). **Estimated and bid quantity: 16.**
- f. T-Intersection Parallel Handicap Ramp (approx.. 100 SF) – This ramp will be installed at T-intersection, across from a corner handicap ramp. The adjoining sidewalk shall be removed as needed to meet the 1:12 maximum slope required to tie in to the back of the ramp. The unit price for this ramp shall include all curb and gutter inside the ramp area, any sod necessary, and 3 blocks of sidewalk. Additional sidewalk required to meet slope requirements will be paid as sidewalk. See Detail SCS-8 for additional notes. **Estimated and bid quantity: 2.**

7. Coping Wall:

Coping wall at the back of the handicap ramps may be required. The need for a coping wall will be made on a ramp by ramp basis according to the existing field conditions at each location as designated by the Bartlett Engineering Inspector. Coping wall shall be 6" wide curb and up to 9" tall (as determined by field conditions) at the lowest point, in the area of the handicap ramp, and transition into the grade of the sidewalk. The back of the coping wall shall not be more than 10' behind the face of the curb (be completely inside the 10' ROW) and the face of the coping wall must start at the back of the sidewalk. **Estimated quantity: 219 LF, Bid quantity: 230 LF.**

In some cases sidewalk must narrow to meet this requirement. Coping walls vary in length as needed at each location, but are approximately 17' long (+/-). Coping walls that extend beyond the width of the handicap ramp shall be separated from the ramp border with expansion joint material, just as the adjacent sidewalk. Coping wall will be paid for as a per linear foot item if needed, including the tapered sections. Coping walls are shown on the handicap ramp details as a dotted line, See SCS-2, SCS-3, and SCS-5.

CONCRETE REPLACEMENT PROJECT

Sealed Bid #: FY2020-08-010

Due Date: August 22, 2019

8. Sod:

Sod will be paid per square yard and used only if needed in a location that did not previously contain sod. **Estimated quantity: 17 SY, bid quantity: 100 SY**

9. Fill Sand:

Sand will be used if subgrade conditions require a fill material to bring the location up to the proper grade. Sand will be paid per ton. Tickets are required. **Estimated quantity: 0.5 TONS, bid quantity: 100 TONS.**

10. Saw-cutting:

This item is for linear feet of saw-cutting the sidewalk, driveway, drive sidewalk, or water table concrete as marked. This item is included separately because some sidewalk, driveway and water table portions to be replaced are small and require multiple cuts to remove the damaged area, making each location somewhat different. Saw-cutting for the removal of asphalt and subsequent asphalt patching may be required in front of new handicap ramps where the finished concrete will not be flush with existing road asphalt pavement. This asphalt cutting will be paid under this item. Any saw-cutting needed to replace other items beside the items discussed here, will be included in the price of that item. The bid price for 4" saw-cutting will be used for replacing portions of 4" thick sidewalk. Any regular saw-cuts on sidewalk joints to remove whole blocks of sidewalk will be included in the price of the sidewalk item and not paid for separately as saw-cutting. The bid price for 6" or 8" saw-cutting will be used for removing portions of water table, driveway apron, or driveway sidewalk. **Estimated quantity for 4" saw-cut: 350 LF, Bid quantity: 360. Estimated quantity for 6-8" saw-cut: 188 LF, Bid quantity: 200 LF.**

11. Extra Demo:

Demolition is included in the price of each concrete item described above as incidental to that unit price. This item is paid for extra concrete demolition above the amount required/expected to install the new item at a specific location. For example if a ramp being installed is smaller than the ramp coming out of a specific location (due to changes in regulations from when the older one was installed) this item will pay for the difference in square foot area between existing and new. In most instances where this item is used, a newer style of ramp is being used and it is smaller than the older ramp being removed. Most of the uses for this item will be 4" thick concrete removal, however extra demo may be needed where thicker driveway concrete will be removed. There is not another item for the thicker extra demolition. It will be paid at the unit price for this item. **Estimated quantity: 312 SF, Bid Quantity: 325 SF.**

12. Demolition:

- a. The contractor shall saw-cut a joint on each side of the concrete area to be removed. Any damage to the adjoining surfaces shall be the contractor's responsibility to repair/replace in an acceptable manner.
- b. Any loose concrete and/or asphalt disturbed with the replacement should also be removed from the site.
- c. Disposal of all construction debris is the responsibility of the contractor.

CONCRETE REPLACEMENT PROJECT

Sealed Bid #: FY2020-08-010

Due Date: August 22, 2019

- d. The contractor shall promptly clean up the debris created from the demolition of the existing sidewalk or curb and gutter. Any dirt placed in the street or grassed areas shall be removed and surface cleaned.
- e. Contractor shall be responsible for traffic control as per the current MUTCD and costs of traffic control shall be incidental and shall be included in the bid price for other items and shall not be paid for separately.
- f. Contractor shall be responsible for the protection of any freshly paved concrete and if damaged, shall replace with no additional costs.
- g. At new handicap ramps there must be a flush transition from the ramp entrance gutter to the road asphalt. If a bump exists between the asphalt and gutter, the asphalt must be saw-cut and removed prior to subsequent asphalt patching in front of the ramp opening. Saw-cutting will be paid at the unit price for that item, but removal and haul-off of the asphalt will be the contractor's responsibility and included in the cost of the handicap ramp. Contractor is required to protect the public from the resulting trip hazard until the City installs asphalt in the void.

TECHNICAL SPECIFICATIONS

SIDEWALKS, CURBS, GUTTERS, AND WHEELCHAIR RAMPS, AND OTHER

1. GENERAL

- A. Construct sidewalks, curbs, gutters, handicap ramps, and water table to the cross sections elevations, lines, grades, and other details as indicated on the drawings. Construction requirement not shown on the drawings shall be as specified hereinafter.

2. CONCRETE

- A. All concrete shall be 4,000 psi Limestone, 5% Air Entrained, ready mixed type conforming to ASTM Specification C94; composed of Portland cement and sand all conforming to applicable ASTM Specifications mixed with clean water, free of oil, acid, alkali, inorganic matter; and supplied by an approved ready mix plant. The design mix shall be the ready mix plant's standard for the specified strength, as established and tested by approved laboratory, in accordance with applicable ASTM standard specifications, and shall include fiber mesh.
- B. Prior to beginning construction and before using the proposed concrete on the job, submit to the City for approval a copy of laboratory test reports of the proposed concrete mix and materials.

3. FORMS

- A. Forms shall be steel or 2" thick lumber, true to proper dimensions, smooth, free from warp, sufficiently braced to resist springing out of shape, and accurately set to proper lines and grades. Remove mortar and dirt from previously used forms, and thoroughly treat them with oil before reusing them. Cross forms shall be 1/4" thick steel, of the full width and depth of the concrete work; leave these in place until the wearing surface has been floated and has attained its initial set.
- B. Set sidewalk forms to provide 1/4" per foot sidewalk fall with 1/2" per foot fall in grass toward the curbs, for proper drainage.

4. JOINT FILLER

- A. Joint filler for all expansion joints shall be an approved suitable elastic waterproof pre-molded compound which will become soft and push out in hot weather, nor become hard and brittle and chip out in cold weather.
- B. Sidewalks: Filler shall be at least 1/2" but not more than 1" thick, at least as wide as the slab thickness, and length equal to that of the expansion joint involved.
- C. Curbs, Gutters, and Handicap Ramps: Filler shall be not more than 3/8" thick, and shall expand the full depth of the concrete work involved.

CONCRETE REPLACEMENT PROJECT
Sealed Bid #: FY2020-08-010
Due Date: August 22, 2019

5. SUBGRADE

- A. Prepare sub-grade by excavating or filling to proper depth to set finished tops of concrete work at the elevations indicated on the drawings. Provide gravel base where indicated on the drawings.
- B. Remove vegetation and material that will not compact properly and replace it with suitable fill material. Do all filling required to bring the sub-grade up to proper elevation, in 4" maximum thickness layers, and thoroughly ramp, tamp or roll each layer until the fill is compact and firm. In all case bring the sub-grade or base to proper grade in a uniformly firm condition before placing concrete. Do not place any concrete until the City has inspected and approved the sub-grade or base.

6. SIDEWALK MARKINGS

- A. Cut surface of concrete walks into flags by marking with an edging tool having a 1/4" radius. Flags shall not be longer than 6 feet on any side, and not longer than the sidewalk width. Round all surface edges and cross marking between slabs to a 1/4" radius.

7. CURB AND GUTTER CONSTRUCTION

- A. Finish the edges as indicated on the drawings. Block out the area to be replaced in 20- foot maximum length sections, and install each section in one continuous operation so that the curb and gutter will be monolithic. Place only on approved sub-grade or base.

8. HANDICAP RAMPS

- A. The contractor shall install handicap ramps at crosswalks. All such ramps shall be constructed in accordance with the design specifications of the Tennessee Department of Transportation and Bureau of Highways. See detail at the end of this Section.

9. EXPANSION JOINTS

- A. Sidewalks: Provide expansion joints with filler as specified herein before, at the following locations:
 - 1. On 25 foot maximum centers.
 - 2. In a square outline around each object in sidewalks, such as fire hydrants, utility poles, lighting standards, etc.
 - 3. At other locations indicated.
- B. Curbs and Gutters: Provide expansion joints with filler as specified herein before, on 20 foot maximum centers, and at other locations indicated. Score joints on 10' centers.

CONCRETE REPLACEMENT PROJECT

Sealed Bid #: FY2020-08-010

Due Date: August 22, 2019

10. PLACING CONCRETE

- A. Place concrete only on a moist upgrade or base course, and not adjacent to or around utility structures, etc. until such structures have been set to the proper grade. Do not deposit any concrete until the sub-grades and forms have been inspected and approved by the City.
- B. Transport concrete from the mixer and place it by methods that will prevent segregation of materials and loss of ingredients. Deposit each successive batch in one layer by a continuous operation. Do not under any circumstances place any concrete that has taken its initial set.
- C. Space and/or vibrate the concrete so that it will flow together and completely fill all void spaces without honey combing, especially along forms and cross joints. Strike off and tamp the concrete until mortar is flushed freely to the surface and a dense surface is obtained, free from porous and rough spots, and at the required section and grade.
- D. The method of placing the various sections shall produce a straight clean-cut joint between them, and make each section between expansion joints an independent unit. No concrete in excess of that needed to complete a section at the stopping of work shall be used.

11. FINISHING

- A. After the concrete has been brought to required grade with a strike board and sufficiently tamped to bring the mortar to the surface, finish it as specified below.
- B. Sidewalks: Float concrete to a true even surface, and finish it with a steel trowel finish. After it has taken its initial set, brush the surface lightly with a soft bristle brush, at right angles with the street centerline.
- C. Curbs and Gutters, water tables: Finish surface with trowel and float to an approximately true plane.
- D. Handicap Ramps: Scored lines shall be spaced at 6" centers parallel to the ramp on the side slopes and broomed transverse to the slope.
- E. Do not apply heat cement to any concrete surface to hasten its hardening.

CONCRETE REPLACEMENT PROJECT

Sealed Bid #: FY2020-08-010

Due Date: August 22, 2019

12. CURING AND PROTECTION

- A. As soon as the finished concrete work has hardened sufficiently to prevent damage thereto, keep the surface damp for at least three (3) days. Cover the surfaces with approved curing compound, burlap, straw, earth, sand or other approved materials. Apply water as required to keep forms and covering materials saturated continuously throughout the curing period. Sprinkling the surfaces with water without covering will not be acceptable.
- B. Protect the freshly finished concrete from hot sun and drying winds until it can be sprinkled and covered as above specified. The concrete surface shall not be damaged or pitted by raindrops; provide all necessary protective covers in case of rain before the concrete has hardened sufficiently. Protect all concrete from traffic for at least three (3) days after its completion.
- C. Cold Weather Protection: Air temperature shall be 40 and rising before any concrete is placed. Whenever the air temperature may be expected to reach the freezing point, spread straw or other blanketing material to sufficient depth to keep concrete from freezing, or provide enclosure and heating device capable of maintaining concrete temperature of at least 50 degrees Fahrenheit. Maintain such protection for at least five (5) days. The Contractor shall be responsible for removing and replacing any concrete injured by frost action.

Release of Liability on Drive Apron

I, property owner of _____ have requested that my drive gutter be removed and replaced by the City of Bartlett. I acknowledge the fact that my drive apron is in good shape but the curb and gutter need to be replaced. I understand that the removal of the drive gutter could damage the remaining driveway apron. I promise to release the City of Bartlett and their contractor from liability for the driveway apron replacement if any cracking or chipping occurs during the saw-cutting, removal, or replacement of the end of the driveway.

The contractor will repair any cracked, chipped or broken area but will **NOT** replace the entire driveway unless specifically requested by the property owner and the property owner agrees to pay the contractor as per the contract unit price for driveway. The City of Bartlett Engineering Inspector, the concrete contractor and I have agreed that this driveway is a good candidate for this type of repair.

Therefore, all bids will be considered, but every bidder must state, in detail, where his product fails to meet these specifications. Unless otherwise stated, these specifications are not intentionally written to favor any one Manufacturer, and are only for the purpose of indicating generally the type of work required of said bid items. It is the intention of the City to purchase quality products and not necessarily the products with the lowest initial cost.

1. All bidders must clearly identify any and all deviations from these specifications that their products may have; however, bids must meet or exceed specifications.
2. Bidder shall include the specification check list, along with the signed pricing sheet, current W-9 form (IRS Rev Oct 2018), and the notarized Public Acts 109 form (page 10).
Note: An original, clearly marked, and two copies shall be included in the bid package.
3. All prices are to be firm for **180** days from bid due date.
4. The City reserves the right to reject any and all bids.
5. The bid shall state the manufacturer's warranty, along with owner's manuals.
6. An Award Letter and purchase order will be issued to the successful vendor.
7. All charges for transportation and unloading are to be pre-paid by the successful bidder, and are not the responsibility of the City of Bartlett.
8. Unit delivered as a result of the award of this bid shall be a current year model, new and unused.

Note: Bidder may include any additional information or brochures on equipment being presented in the bid package.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See *What is backup withholding?* on page 2.

By signing the filled-out form, you:

- Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),

EXECUTIVE SUMMARY GUIDELINES

The executive summary is a comprehensive narrative that describes the community and the dog park to be funded. Please fill in the below information and submit this with your application. Feel free to use as much space as needed.

1. Tell us about your community/where you want or have a dog park.

The City of Bartlett is a community that is over 150 years old with a population of just over 59,000 proud residents based on 2017 census. After dedication, hard work, and fundraising, the City allocated land located in north Bartlett to build the animal shelter in 2003 to house the area's homeless pet population and give them a second chance at life. At this time, the City also fenced in a large area next to the animal shelter for the City's dog park, giving the community a safe place to gather and allow their pets to be off leash and enjoy nature.

2. Why does your community deserve a Boyd Foundation dog park grant?

Grant funding for the Bartlett dog park would provide the community and dog park an opportunity for increased use. It would provide the park and community additional variety and longevity of use. Our City takes pride in its dog park and pets. Our City and community are invested in our dog park. This has been shown through the Eagle Scout Program. Several scouts have built picnic tables and pavilions over the years to help improve the park.

3. What dog-friendly places or activities does your community already have?

While the City is home to many dog friendly parks, the City's dog park is the only area in which dogs are allowed off-leash. Many sunny afternoons you will find several residents and their pets taking advantage of the dog park. Aside from the dog park, the community also has a pet show the residents take advantage of that is hosted by the City's Parks Department. The Animal Shelter also hosts a microchip and Rabies drive once a year. Both of these events are huge successes in the community.

4. Would you like to enter your community to win the Grand Prize of \$100,000?

- ☒ Yes, we have a plan to use the \$100,000 and believe we are a very pet friendly community.
- ☐ No, \$25,000 is enough to build a dog park in our community.

Note: The Grand Prize is highly competitive! Entrants are asked to submit additional materials such as media coverage, letters, receipts of charitable giving, photos or videos, etc. to support claims of pet friendliness. See contest rules for additional details.
