**Mayor's Statement:** *"Before we begin, I want to address a recent internal miscommunication involving several FY2026 paving projects. While these projects were included in the proposed budget, they had not yet received final approval, and the work should not have begun. As soon as the Administration learned that the projects had begun without authorization, we took immediate action to pause further work and review the situation. One project had already been completed, and two were in progress. All Aldermen were individually notified of the situation and, after explaining the condition of the BPACC parking lot, agreed that completing the project was necessary, given its state and the upcoming event schedule. Tonight, we are acknowledging this miscommunication and want the public to know that steps are being taken to ensure this does not happen again."*

Rekor Renewal for BMA

# BARTLETT POLICE DEPARTMENT

## Public Safety Security Camera Systems Software Renewal

### Project Description:

- The Police Department seeks approval to renew the existing License Plate Recognition (LPR) software used with the City's Public Safety Security Camera (PSSC) systems. In 2023, the Board of Mayor and Aldermen approved the purchase of PSSC Systems with live-view and LPR capabilities. The original purchase included a two-year LPR software subscription for each system, and that subscription period is now approaching renewal.
- The existing camera infrastructure was designed to process LPR data on-site at each camera location. This approach minimizes the need to transmit additional high-definition video streams over cellular connections and helps maintain efficient network performance.
- The system is used for public safety purposes and is intended to process license plate information in accordance with applicable laws, policies, and retention requirements. Data access is limited to authorized personnel, and retention practices are designed to support legitimate public safety purposes while protecting individual privacy.

### Vendor Selection:

- Representatives from our organization have reviewed multiple LPR software options to determine compatibility with the City's existing infrastructure and operational requirements. Based on that evaluation, Rekor Recognition Systems, Inc. was identified as the only vendor known to the department that currently provides software capable of processing LPR data locally on-site while supporting the City's existing and planned camera systems.
- Renewing the current platform is expected to maintain continuity with the existing infrastructure, avoid unnecessary system changes, and support future expansion of the City's LPR capabilities.

### U.S. General Services Administration Purchase Contract Options:

- The United States General Services Administration (GSA) has established various purchasing contracts, which establish a source or sources of supply for all federal agencies and eligible state, local, territorial, and tribal governments. These contracts require vendors to provide all goods, services, and deliverables as required by the contracts. Government organizations may use these contracts to purchase directly from the contractor in accordance with all applicable policies and procedures. As a result, we respectfully request to purchase this equipment using the U.S. General Services Administration Purchase Contract. This contract, 47QTCA26D0041, establishes a source of supply for Law Enforcement needs and provides guaranteed discounted pricing.

**Cost & Documentation:**

- After evaluating available options, the Department determined that renewing the existing Rekor LPR software is the most compatible and cost-effective solution for the City's current and planned PSSC infrastructure. Staff therefore recommend utilizing GSA Contract #47QTCA26D0041 to procure the required software services from Rekor Recognition Systems, Inc.
- Rekor Recognition Systems, Inc. has provided a discounted GSA #47QTCA26D0041 contract price for forty-six (46) Rekor Scout LPR software licenses for a total cost of \$36,432.00.
- Funding for this purchase is available in Account # 123.48123.264.
- The following documents are attached for further review:
  - GSA Contract 47QTCA26D0041
  - Quotations from Rekor Recognition Systems, Inc. for LPR software licenses

Thank you for your consideration,

THIS AGREEMENT, made and executed this \_\_\_\_\_ day of \_\_\_\_\_, \_\_\_\_\_  
between the CITY OF BARTLETT, SHELBY COUNTY , TENNESSEE, hereinafter referred to  
as the CITY and STELLING MANOR LLC, hereinafter referred to as the DEVELOPER.

**W I T N E S S E T H :**

WHEREAS, the CITY PLANNING COMMISSION has approved a subdivision plat  
entitled: STELLING MANOR PLANNED DEVELOPMENT dated OCTOBER 6, 2025, made by  
the  
DEVELOPER; and

WHEREAS, the CITY PLANNING COMMISSION has approved the Construction  
Plan and established certain conditions for approval of the Final Plat of said subdivision in  
accordance with Section 13-4-301, Tennessee Code Annotated, and the City Subdivision  
Regulations, one of which is the approval of this Development Contract by the CITY BOARD OF  
MAYOR AND ALDERMEN; AND

WHEREAS, the CITY and the DEVELOPER by the terms of this contract desire to  
specify those detailed costs, division of responsibilities and maintenance and other conditions in  
addition to the Subdivision Regulations and the Construction Plan, heretofore approved, according  
to Law by the CITY PLANNING COMMISSION, said additional terms not to be considered as a  
variance from or modification to regulations, plans or plat, as approved on the date of execution;  
and

WHEREAS, this Subdivision Development Contract is entered into by the CITY at the instance of the DEVELOPER upon the understanding that the DEVELOPER shall remain fully responsible for specific compliance with the requirements of the Subdivision Regulations, the Technical Specifications of the CITY, and the Construction Plan, duly prepared by the CITY PLANNING COMMISSION subject to review and recommendation of the CITY ENGINEER, and

NOW, THEREFORE, in consideration of the promisee and mutual covenants of the parties herein contained, and other considerations herein recited, it is agreed and understood as follows:

### **GENERAL PROVISIONS**

1. That the DEVELOPER shall at his expense provide all roads, drainage, storm drains, catch basins, rights-of-way, easements, open improvements and installations to be constructed as set forth herein and on the approved Construction Plans, including construction of all off-site improvements and drainage systems (pertaining to this development).
2. That the DEVELOPER shall pay the expenses of engineering inspection by the CITY ENGINEER along with any laboratory testing expenses deemed necessary by the CITY ENGINEER and incurred for material testing and soil density and moisture content test, provided, however, that the DEVELOPER shall remain fully responsible for construction to the approved design and quality control, and that the CITY ENGINEER is vested with the right of periodic inspections, final approval and stop work order as a measure of secondary or subsequent enforcement.
3. That the CITY in its proprietary function does not purport to specify the development layout nor the choice of available land uses; nor does the CITY PLANNER design, supervise, nor certify the adequacy, structural integrity, or capacity of improvements or installations within or without

the limits of the development; neither is the CITY ENGINEER vested with any authority or responsibility for the design of any improvements or installations within or without the limits of the development; nor is the CITY ENGINEER required to determine the structural integrity, capacity, elevation, location, type or adequacy of any improvements or installations.

4. That in providing technical assistance, planning and review of subdivision development the CITY seeks to enforce its minimal governmental standards and does not relieve or accept any of the DEVELOPER'S liability and responsibility for proper design, construction and installation of improvements within or without the limits of the subdivision.

5. That subject to the warranty provisions herein, after completion of the improvements, subject to final inspection and written approval of the CITY ENGINEER, submission of as-built drawings, approval and recording of the Final Plat of said subdivision, and acceptance by the CITY of the dedication of public improvements and land, the CITY does thereafter accept responsibility for the maintenance of all public improvements excepting sidewalks which shall be maintained by the property owners. Such responsibility for maintenance of sidewalks shall be so noted on the Final Plat of said subdivision.

6. That all easements granted by the DEVELOPER, to be recorded on the Final Plat of said Subdivision, shall be specifically reserved for the use or uses noted on the approved Construction Plans.

7. The DEVELOPER is required to select URD of the Memphis Light, Gas, and Water's application for Utility Services for residential subdivision. Underground Residential Distribution (URD) shall mean that all primary feeders to the subdivision and within the subdivision shall be underground to pad mounted transformers located at the side property line between the houses. The secondary service shall also be underground. Any pad mounted switchgear, as required shall be located on the side property line.

8. That when mutually agreed by the CITY and the DEVELOPER that the CITY will design and/or install any of the required improvements, the DEVELOPER shall deposit in cash or by certified negotiable instrument the full cost of such improvements, based on current prices at the time of execution of a separate contract for such design and/or installation by the CITY prior to the date the DEVELOPER requests installation to commence. It is understood that the CITY will not order materials, schedule work, or expend any funds until the required funds are delivered to the CITY by the DEVELOPER.

9. That for non-residential development within the subdivision, all storm water drainage shall be collected on site and conveyed by drainage structures to the public storm sewer system. Further, non residential development having more than one-hundred and fifty thousand (150,000) square feet of improved area, building and parking, shall have all drainage structures designed by the slow release method. The design calculations for such structures shall be submitted to the CITY ENGINEER for approval prior to construction.

10. That the DEVELOPER shall haul all scrap building materials, debris, rubbish, and other de-gradable materials to a permitted landfill, and not bury any such materials within the limits of said subdivision (except if they are permitted to burn by Shelby County Health Department and the Bartlett Fire Department).

11. That if a bond has been executed to secure the value of the improvements to be constructed and installed under this contract and said bond, due to inflation and/or rising costs, is inadequate to secure the cost of said improvements when an extension of the contract period is sought, the DEVELOPER shall provide the additional security to bring the bond amount in line with current cost projections by the CITY ENGINEER and approved by the CITY PLANNING COMMISSION.

12. That the CITY and any of its agencies will not unreasonably withhold approval of time extensions where the DEVELOPER has provided the required notice to the CITY ENGINEER and such additional security as may be deemed necessary.

13. That the DEVELOPER understands that failure to follow this time extension procedure constitutes a breach of contract and places the DEVELOPER in violation of the Subdivision Regulations and subject to a declaration of default.

14. That the DEVELOPER will not transfer the property on which this subdivision is to be located without first providing the CITY ENGINEER with prior notice of when and to whom transfer is to be made. If the transferee intends to develop this subdivision in accordance with the approved Construction Plans and Final Plat, if already approved and recorded pursuant to this contract, the DEVELOPER shall provide the CITY ENGINEER and the CITY ATTORNEY an Assumption Agreement by which the transferee agrees to perform and complete all the requirements of this contract and to provide the surety needed to secure such performance. Said agreement shall be subject to approval of the CITY BOARD OF MAYOR AND ALDERMEN.

15. That the DEVELOPER understands that transfer of said property without providing the notice of transfer and Assumption Agreement as required herein shall be a breach of contract and places the DEVELOPER in violation of the Subdivision Regulations and subject to a declaration of default.

16. That the DEVELOPER shall comply with all applicable Federal, State, and local laws, and it shall be the DEVELOPER'S responsibility to furnish proof of said compliance upon demand.

17. That should the DEVELOPER default in any part of this contract and it becomes necessary to engage an attorney to file necessary legal action to enforce the provisions of this contract or sue for any sums of money due and owing or liability arising incident to this contract, the DEVELOPER shall pay to the CITY reasonable attorney's fees.

18. That the Developer shall furnish, on demand of the CITY ATTORNEY, satisfactory evidence that the DEVELOPER has the lawful right to enter into this contract for the purpose herein contained.

**RE: #1 New Tymco 600 Street Sweeper Budget Request**

---

**\$ 397,000** is requested to purchase a new Tymco 600 w/ Peterbilt 220 Chassis. It will be replacing #7006, which is a 2013 Elgin Crosswind w/ Autocar Chassis. It has over 70,000 miles on it and our oldest sweeper. In recent years it has spent several months in the shop for various issues from wear and tear of everyday use. We use it as a back up for the newer sweepers when they are in shop. Often, a new issue comes up when we need it leaving us with no sweepers on hand.

Thanks, Jonathan Walker

**Item Memo**

**Consent Summary:**

Recommend awarding a 3-year contract to SOLitude Lake Management as the sole source provider for TryMarine Management for water remediation at the retention pond at Stoneridge Park. The total contract cost is \$50,000 with \$18,000 for Year 1, \$17,000 for Year 2, and \$15,000 for Year 3. Funds are available in Account 125.48125.923.

**Formal Body:**

TryMarine is a photocatalyst that works to reduce sediment oxygen demand, allowing more oxygen to remain available near the bottom where oxygen depletion is most severe. Over time it reduces sediment and restores health to the water body it is applied to. This solution is designed to address the root causes of oxygen depletion by dissolving organic sediment and muck at the bottom of the water body.

SOLitude Lake Management will apply a liquid formulation of TryMarine to the surface of the waterbody at a rate of 0.5-4ppm per application. Applications will be made by SOLitude throughout the growing season each year on a weekly, bi-weekly, or monthly scheduled as required. SOLitude will monitor select water quality parameters and sediment characteristics before, during, and after the program to help guide adjustments and to document effectiveness. A year end report with findings will be provided.

Our recommendation is to award a 3-year contract to SOLitude Lake Management as the sole source provider for TryMarine Management at the retention pond at Stoneridge Park. The total contract cost is \$50,000 with \$18,000 for Year 1, \$17,000 for Year 2, and \$15,000 for Year 3.

Funds are available in Account 125.48125.923.

## OUR STORY

In 2005, **Dr. Farshid Soheili**, a nano/bio-electrical engineer, set out to solve an evolving global problem: the steady decline of lakes and ponds overwhelmed by excess nutrients. Herbicides and algacides could knock back symptoms for a while, but they couldn't restore the natural balance found in healthy waters bodies. Dr. Soheili believed there was a better way - **a solution that worked *with* nature, not against it.** That vision became TryMarine.

After years of research and successful applications, TryMarine has delivered results broadly deemed impossible. It helps damaged lakes and ponds "turn back the clock," reversing the impacts of fertilizer overuse, polluted runoff, and decades of nutrient buildup, recovering the clarity, vitality, and resilience of youth.

TryMarine is now being used in water bodies of all sizes across the United States and has an almost perfect record in a broad range of applications (96%+ project continuation rate.) Most TryMarine deployments are in severely degraded lakes, having already exhausted other strategies.

**TryMarine brings a paradigm shift to lake restoration – what was once thought impossible is happening daily!**

**VIRTUOUS**

**ACTION**

## OUR MISSION

TryMarine exists to help water bodies break free from the vicious cycle of excess nutrients, sediment buildup, and eutrophication, and move into a **virtuous cycle of recovery and healing.** Our purpose is simple: restore and beautify inland waters while supporting the ecological systems that make them thrive.

We approach every challenge with environmental responsibility and scientific rigor as touchstones. Our solutions are engineered to support natural processes, protect wildlife, and respect the intricate natural dance that perpetually produces clean water.

We recognize the deep connection between people and world — how water shapes our well-being, and how our actions shape water. This partnership deserves care, balance, and thoughtful stewardship – our global future demands it.

TryMarine is a long-term, sustainable answer to a growing global tragedy of poor management and overuse of water resources. By harnessing natural systems, **TryMarine literally breathes life into suffocating water bodies, turning a vicious cycle into a virtuous cycle, giving water bodies back to Mother Nature.**

## Why So Many Water Bodies are Getting Sick — and Why it Matters to You

Across the world, lakes, ponds, rivers, and coastal waters are changing in ways that are easy to miss at first, but with enormous consequences. Waters that once supported healthy fish populations, clean recreation, and thriving wildlife are slipping into decline under the same pressure: **too many nutrients, too much phosphorus.**

This overload triggers **eutrophication, a slow but destructive process that turns clear, vibrant water into algae-choked, oxygen-starved, muck-filled systems.**

In the United States the scale of the problem is unmistakable. About 70% of lakes and reservoirs, and more than half of rivers and streams, are officially classified as impaired — with excess nutrients as the leading cause.

This isn't just an environmental concern — **declining conditions impact everyday life:**

- Drinking water safety
- Fish populations and food systems
- Local economies and property values
- Recreation and tourism
- Public health
- Climate stability

## Why It's So Hard to Fix

One of the most dangerous aspects of eutrophication is how quietly it develops. Nutrients accumulate in the sediment at the bottom of a lake, and act as a long-term storage bank of phosphorus. Even if outside pollution is reduced, this stored phosphorus perpetually leaches back into the water, fueling deterioration.

Once a lake crosses the threshold into a eutrophic state, **recovery becomes slow, uncertain, and, if possible, expensive.**

Most water bodies never return to their earlier, younger state.

Many experts currently believe that it's easier to prevent nutrient inflow than to repair the damage, but **prevention has been elusive.** Nutrient inputs continue to rise, and the cost of inaction grows every year.

## Why the Problem is Accelerating

Several modern pressures are pushing eutrophication faster than natural systems can withstand:

- Increasing fertilizer use and livestock production
- Expanding cities and paved surfaces
- Heavier rainfall that washes nutrients into waterways
- Warmer temperatures that supercharge algal growth and toxin production

## The Climate Connection

Eutrophication isn't just a water-quality issue — it's now recognized as a climate issue too. Higher oxygen demand in nutrient-rich waters promote optimal conditions **for methane production**, a greenhouse gas far more potent than carbon dioxide. Scientific models suggest that rising nutrient pollution could cause 30–90% increases in methane emissions from inland waters over time.

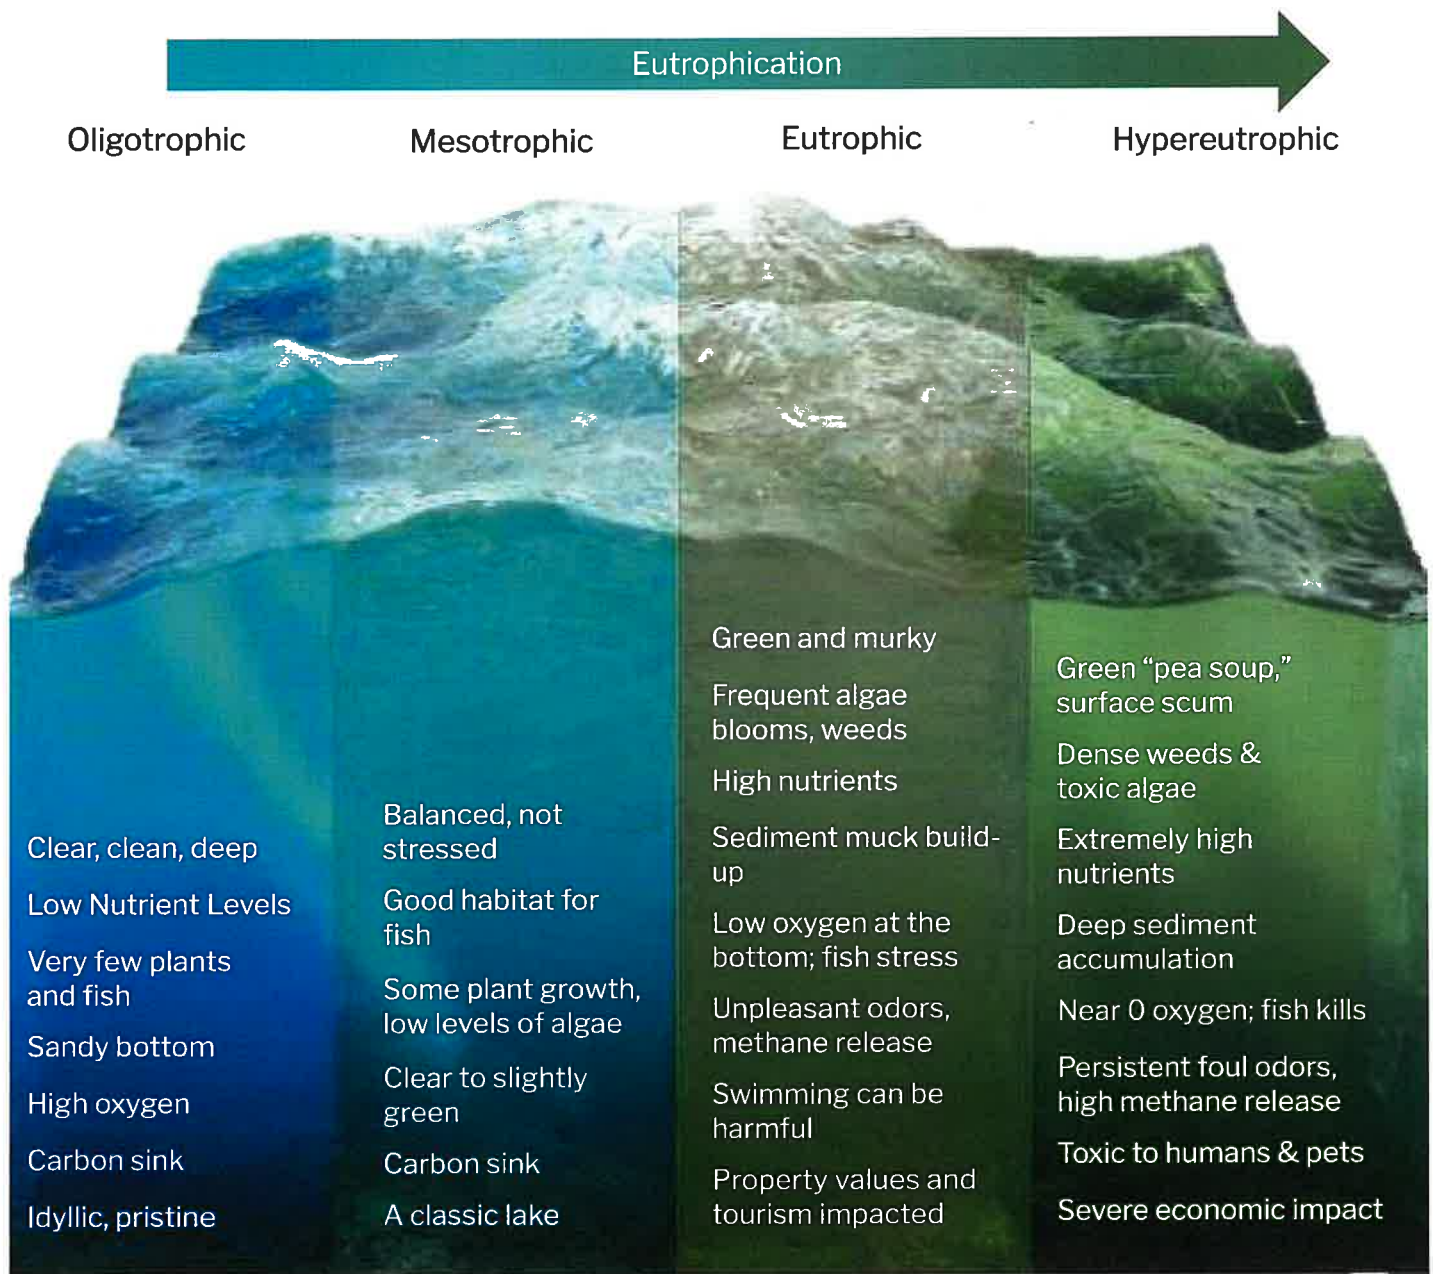

Thus, a **dangerous feedback loop** is created: warmer temperatures accelerate eutrophication, which increases methane emissions, which further accelerates warming.

## What Does Eutrophication Look Like?

The graphic below shows differences in key parameters between the 4 trophic state levels of inland water bodies.

In general, higher trophic levels have high nutrient and lower oxygen levels, less diversity, deeper muck leading to less water volume, successfully reducing the natural cleansing and refreshing capacity of healthy water bodies.

## TryMarine: A Smarter Way to Restore and Maintain Healthy Lakes

TryMarine is a water-based treatment, applied by spraying directly onto the surface of a lake or pond. During restoration, applications are typically made every other week throughout the warm growing season. Once lakes are in better shape, sometimes simple monthly treatments during warm months are enough to maintain the natural cycle for long-term health.

TryMarine works by **reducing Sediment Oxygen Demand**, allowing more oxygen to remain available near the bottom, where in impaired lakes, oxygen depletion is most severe. This ultimately **improves oxygen balance in the entire water column, supporting healthier aquatic conditions, without introducing living organisms or harsh chemicals**. TryMarine is not a coagulant, flocculant, herbicide, or pesticide, and has no live organisms.

## Safe for Water, Wildlife, and People

Safety is foundational to TryMarine's formulation. It is certified to NSF/ANSI/CAN 60 standards - it is **safe for use in drinking water** applications at concentrations up to 522 times typical application rates. Independent acute and chronic toxicity studies on five of the most sensitive freshwater species showed no harmful effects, demonstrating its **compatibility with aquatic life**.

Because TryMarine improves water quality, its use can significantly reduce or eliminate the need for aggressive herbicides and algacides over time. Unlike some treatments, there are no lake closures required. **Swimming, boating, and normal lake use can continue on treatment days without interruption.**

## Scalable, Flexible, and Non-Disruptive

From small residential ponds to large public lakes, TryMarine scales easily to fit any size water body. It is **especially well suited for locations where dredging or aeration are not practical** due to cost, size, or access limitations.

**No permanent infrastructure is required** - no excavation, no heavy equipment, and no disturbance to the surrounding environment—just simple applications with lasting benefits.

## Cost-Effective by Design

TryMarine is **designed to protect long-term lake health**, helping prevent the costly cycle of emergency treatments and reactive maintenance. Even in severely eutrophic lakes requiring full restoration, treatment plans using TryMarine are **significantly more cost-effective than mechanical alternatives such as dredging, repetitive symptom management or aeration.**

By addressing the root causes of oxygen depletion, TryMarine helps keep water bodies healthier for longer — **reducing both costs and intervention over time.**

TryMarine doesn't just treat symptoms. It restores balance in water bodies from the bottom up.

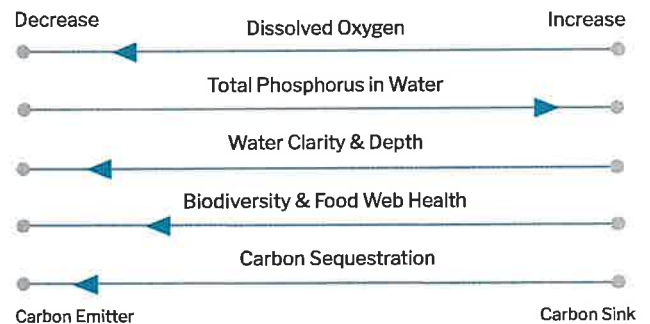

## The Power of TryMarine

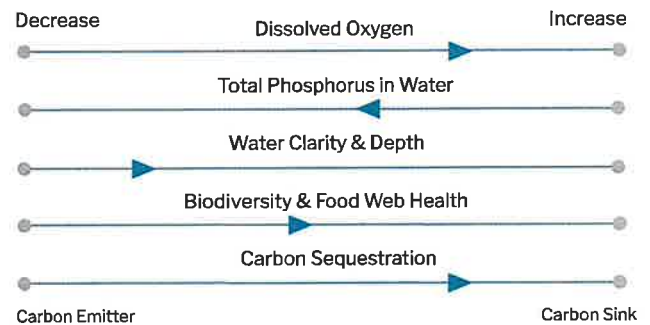

These diagrams illustrate the changes expected when a hypereutrophic water body is treated with TryMarine

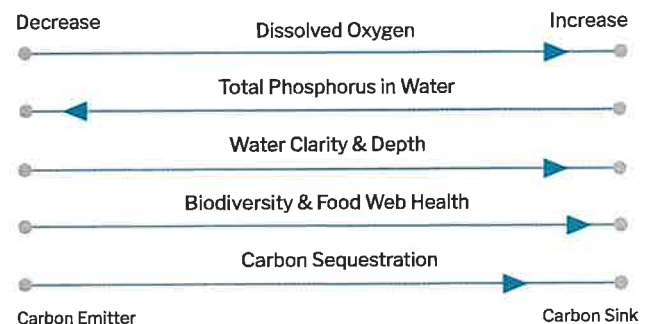

**Hypereutrophic water bodies** are characterized by high phosphorus levels, and low dissolved oxygen, water clarity and biodiversity. The food web is weak, toxin producing algae dominate, fish struggle to survive, and the water body emits high amounts of methane that harm the environment.

**TryMarine begins to reverse the damages** of eutrophication by reducing Sediment Oxygen Demand and increasing available oxygen. Increased oxygen infiltrates the sediment, loosens it, and processes excess nutrients into the food web. Biodiversity improves. Initially, total phosphorus and water clarity may worsen, but in time they improve to a normal state. A virtuous cycle has begun.

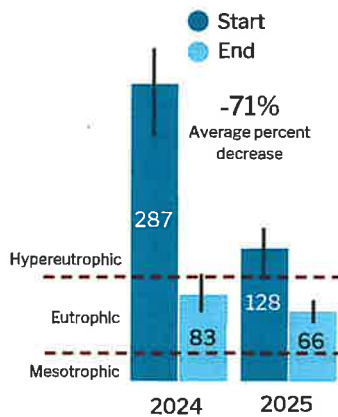

**TryMarine is the only solution that breathes life back into water bodies** and allows self-healing the way nature intended. After a full restoration course, the water body is healthy again. If excess external nutrient inflow persists, preventative TryMarine maintenance is recommended to keep the system from returning to the vicious cycle of eutrophication.

## COMPILED CASE STUDY: 7 WATER BODIES TREATED FOR 2 SEASONS

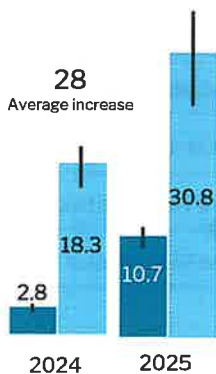

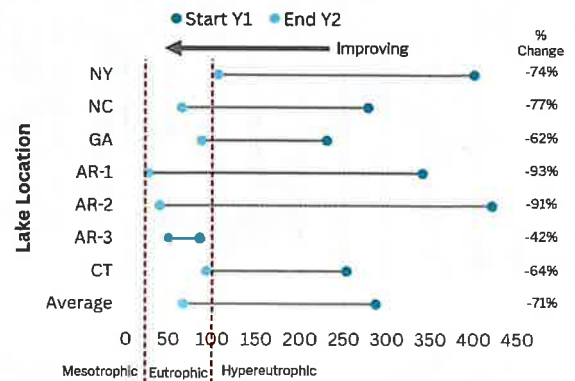

Impacts: De-eutrophication and improved nutrient balance

TryMarine improves water body health from the bottom up, processing excess nutrients in the sediment and water into the food web. These results are from the **first two years of treatment of 7 hypereutrophic or eutrophic water bodies of varying sizes, ranging from ½ to over 400 acres.**

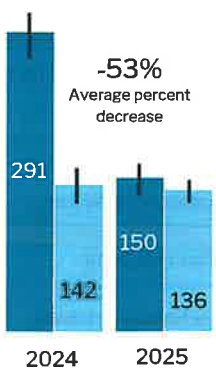

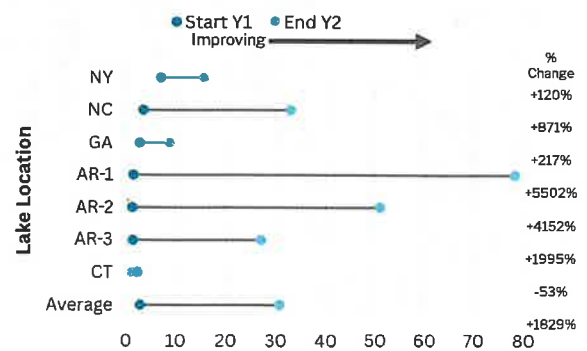

### Total Phosphorus (ppb) in Water

The graph on the left shows the average total phosphorus levels of all 7 water bodies at the start and end of the 1<sup>st</sup> and 2<sup>nd</sup> treatment season. The level is improved season over season, and the changes are sustainable. The graph on the right shows the change in each of the 7 projects, from the beginning of the 1<sup>st</sup> season to the end of the 2<sup>nd</sup> season. Every project had significantly reduced TP in water.

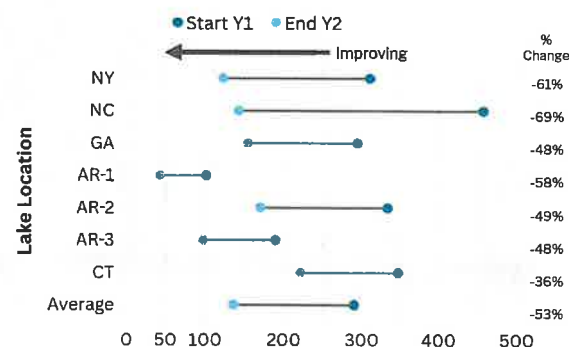

### Nitrogen to Phosphorus Ratio in Water

Low ratios of total nitrogen to total phosphorus indicate an unhealthy water body with nitrogen as the limiting nutrient, which favors nitrogen-fixing phytoplankton. Higher ratios support a diverse food web and robust fish productivity. The one project whose ratio did not increase saw significant reductions in both TN and TP.

### Total Phosphorus (ppm) in Sediment

The total phosphorus in the sediment was reduced in all projects over 2 seasons of treatment, as shown on the right. The average percent reduction across the 7 projects was 53%.

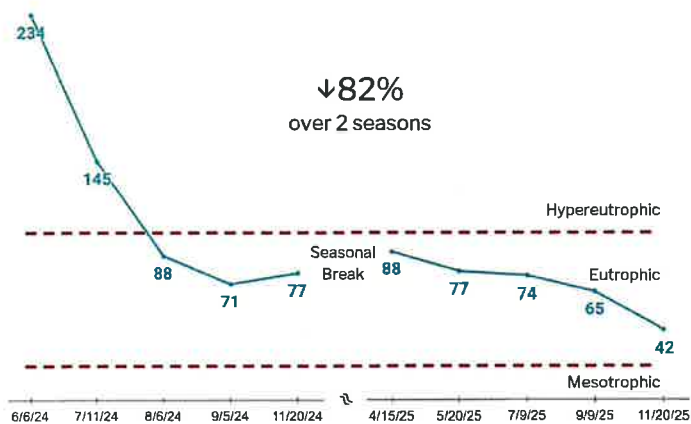

## CASE STUDY: TOTAL LAKE RESTORATION

### 40-acre lake in Wilmington, NC – Years 1 & 2 of a 3-year project

This private lake in Wilmington, NC has a history of being drained for several years, during which time plants grew up in the lakebed. After being re-filled, the undecomposed plant material at the bottom caused very low DO, with prolonged periods of 0 during the summer months, causing fish kills. The owner desired a healthy lake that supported recreational fishing, and Try-Marine was brought in to restore not only the low DO, but to improve the overall lake health and fishery.

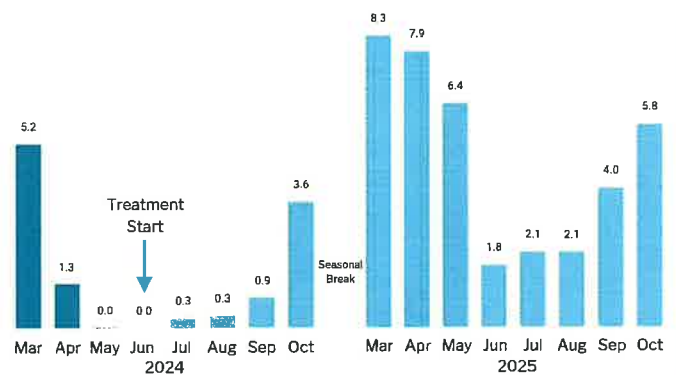

#### 82% Drop in Total Phosphorus (ppb) in Water

TP improved from hypereutrophic to low eutrophic over 2 seasons of treatment. The improvement was **sustained during a 5-month break in treatment over the winter**.

#### Improved Bottom Dissolved Oxygen (Monthly Average)

Before treatment began, bottom DO was 0 in the month of May and during the first month of treatment (June, 2024), but it steadily increased in 2024 and had **year over year improvement for every month in 2025 vs 2024**.

#### Lake Health Improvement is Visible

The appearance of the lake improved substantially, as expected with the water quality improvements shown above.

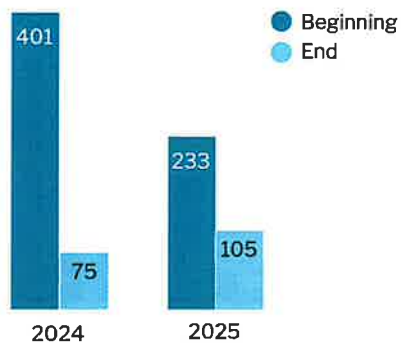

## CASE STUDY: DREDGING ALTERNATIVE

### Scientific study of depth and nutrient effects over 2 treatment seasons

In conjunction with Dr. Christopher Gobler, Distinguished Professor and Endowed Chair of Coastal Ecology and Conservation at Stony Brook University, the effects of TryMarine treatment on a hypereutrophic pond on Stony Brook's campus, Roth Pond, have been studied over the 2024 and 2025 seasons. The pond showed approximately a foot of sediment removal, and a substantial improvement in the nutrient levels, changing the trophic state from hypereutrophic to eutrophic.

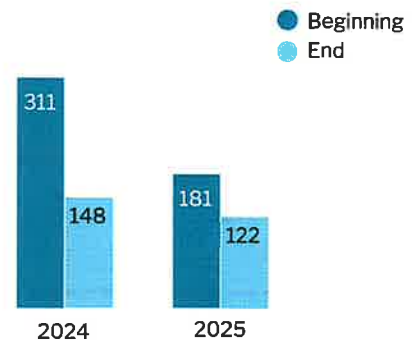

#### Total Phosphorus in Water (ppb)

**TP in the water decreased 74% over 2 seasons of treatment.** There was some increase during a 7-month seasonal break in treatment between the first and second year, but reduction was seen during both treatment periods. The TP is processed into the food web.

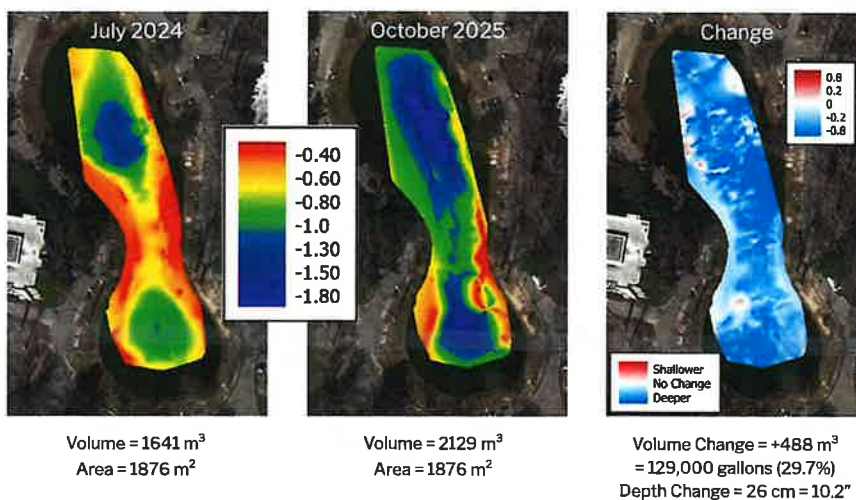

#### Total Phosphorus in Sediment (ppm)

**TP in the sediment decreased 61% over 2 seasons of treatment.** The phosphorus from the sediment is processed into the water and the food web.

#### Water and Sediment Depth Changes

A sophisticated sonar drone was used to measure the depth of the pond over the treatment period. This shows the depth in July 2024 vs October 2025, which was calculated to be a 29.7% increase in water volume and removal of 10.2 inches of sediment.

The right-hand image shows the difference between the two dates, with the blue color showing where the pond was deeper in October.

Data was collected and analyzed using a HYCAT sonar device by Dr. Christopher Gobler, Stony Brook University.

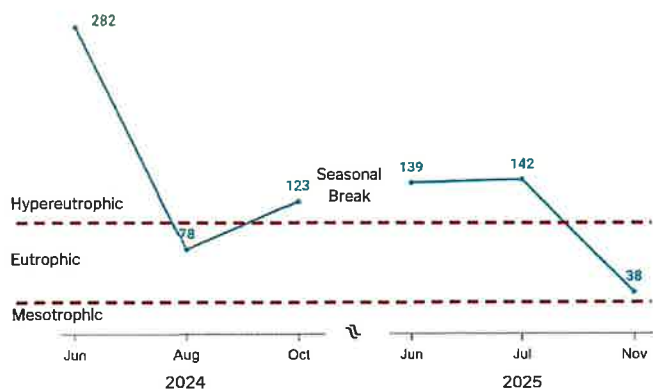

## CASE STUDY: FISHERY IMPROVEMENT

### Private hunting and fishing club – nutrient balancing and fish growth

A hunting and fishing club property in Arkansas consisting of 3 connected lakes totaling 740 acres was suffering from deep sediment accumulation and eutrophication of the water, resulting in poor cypress tree health, low oxygen levels, and stagnant fish growth. Below is average data from the 3 lakes, each of which saw significant improvement with TryMarine treatment over 2024 and 2025. The goals of this project were more focused on water quality and fish health than on sediment remediation, although the latter will also occur with continued treatment, strengthening the resilience of the system.

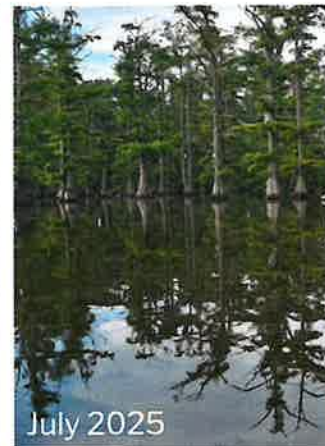

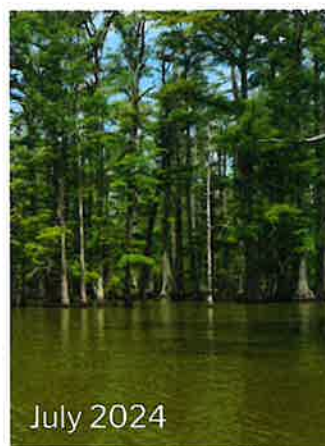

#### Decreased Total Phosphorus (ppb) in Water

**TP improved from hypereutrophic to nearing mesotrophic** over 2 seasons of treatment. The improvement was sustained during a seasonal break in treatment.

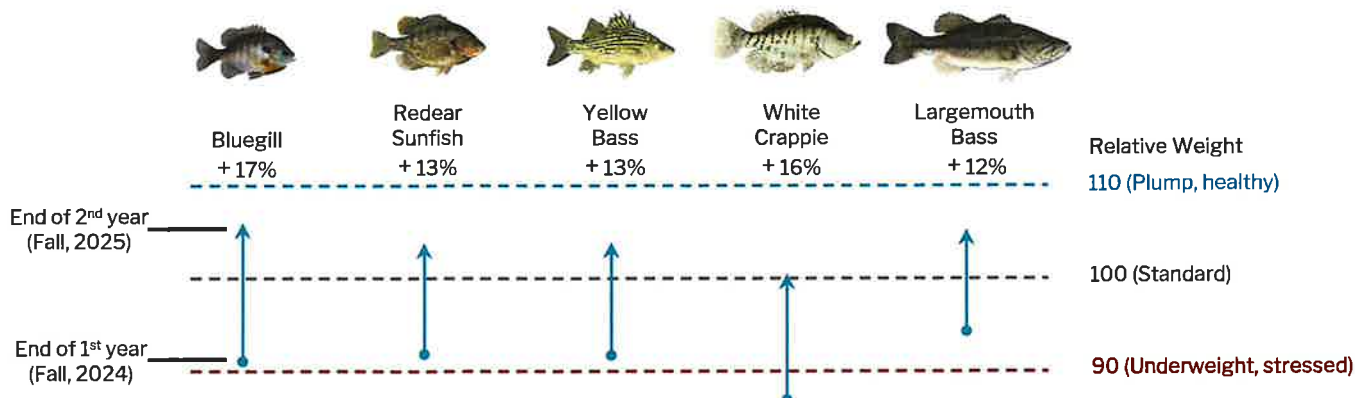

#### Rapid Improvement in Appearance

Two months after TryMarine treatment began, the appearance of the water improved dramatically, coinciding with the drop in TP levels during the same time period (see figure to the left.)

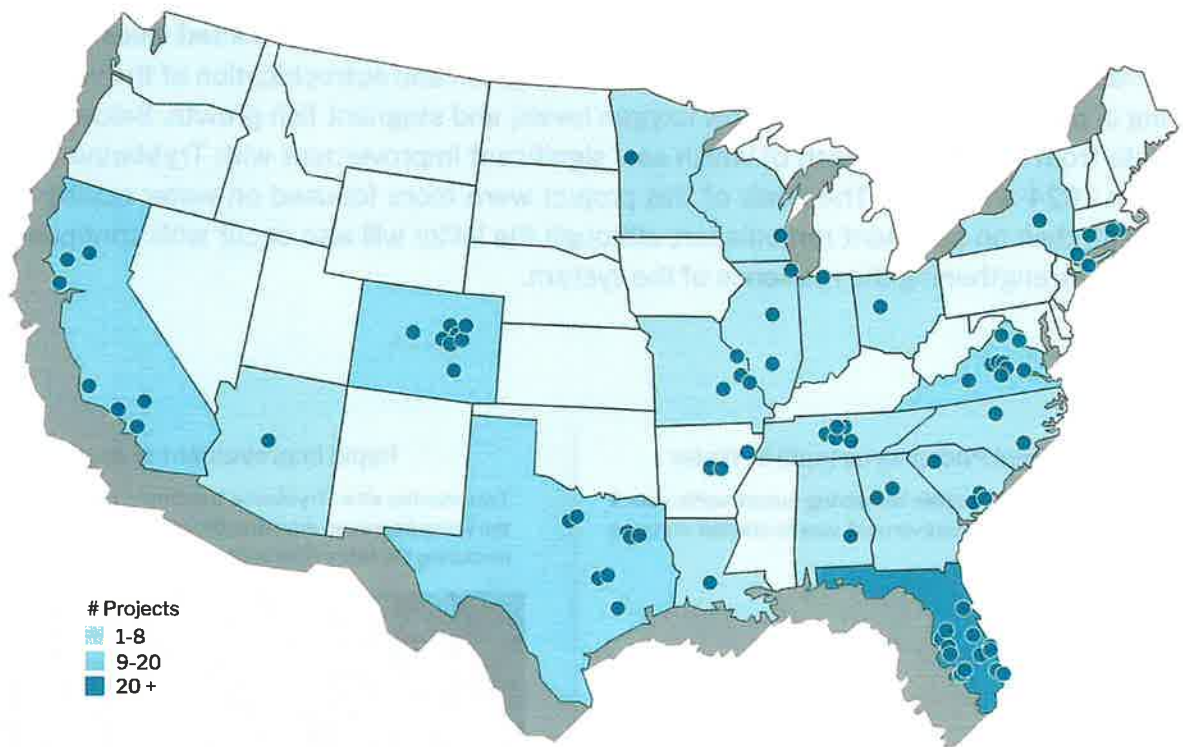

#### Improved Relative Weight of Fish

Relative weight of fish species is an indicator of how well fish are thriving in their environment — and by extension, how well the lake's food web, water quality, and ecological balance are supporting them. Electrofishing in the fall of 2024 and 2025 demonstrated an increase in the relative weight of 5 species, from below normal in 2024 to at or above normal in 2025, indicating an improvement in overall fish habitat.

## HOW TRYMARINE FITS WITHIN LAKE MANAGEMENT STRATEGIES

There are many tools available for lake management – most are reactive strategies that are used once problems arise, and act more like a band-aid than a long-

term solution. All of these have some effectiveness, but TryMarine addresses the root cause and strengthens the ecosystem, strengthening the long-term resiliency of water bodies. TryMarine can be used in combination with other treatments, if needed, to achieve a wide variety of goals.

## FREQUENTLY ASKED QUESTIONS

**What is TryMarine?** Per our label ingredients, TryMarine is a 97% water-based solution containing a natural sourced polymer, trace elements, and diluted acetic acid, (much lower in concentration than household vinegar).

**Is TryMarine Safe?** TryMarine has been used for more than a decade and in hundreds of lakes around the USA. TryMarine is NSF/ANSI/CAN 60 certified, safe for drinking water applications at over 500x the typical application dose. It is safe for swimmers, pets, fish, plants, etc. before, during and after applications. It has been and continues to be tested for safety by 3rd parties. See the **Safety Testing** below.

**How does TryMarine work?** TryMarine is engineered to accelerate a water body's natural ability to process accumulated muck at the bottom, including debris and excess nutrients. This accumulation is often the root cause of unbalanced lake ecosystems, resulting in low oxygen availability, poor water quality, and shallower water levels. By addressing the root cause, over time, TryMarine restores the lake's resilience, depth, balance and beauty.

**How quickly will my lake improve?** Improvement depends on starting conditions. Most lakes look much better by the end of the first season; full restoration takes 3–5 years. Some lakes improve within months, while others briefly look worse as muck breaks down. Early signs such as fluffing sediment, cloudiness, surface film, bubbling, or increased weeds/algae indicate nutrients are being processed. This phase is short-lived and resolves naturally.

**When and how is TryMarine applied?** The ideal start is spring, once water reaches 55°F, with bi-weekly restoration dosing and monthly maintenance through summer and early fall. Mid/late-summer starts depending on climate have also proven effective. TryMarine is sprayed on the water surface through shoreline spray or boat application. Trained application is required for efficacy.

**How can I tell if TryMarine is working?** Technicians assess visual conditions, dissolved oxygen and pH levels each visit to track progress. Early signs such as fluffing sediment, cloudiness, or surface film and bubbling, indicate that muck is being processed – this naturally resolving phase is short-lived. In addition, water and sediment samples are collected as needed. Occasionally as deeper sediment layers are exposed, nutrient levels may fluctuate for extended periods, but they generally decline over time.

**How much depth will I gain?** Water depth can increase 6-12 inches or more per restoration season, with variability within sections of the waterbody. Significant improvements in sediment composition are often observed. Precise sediment-reduction measurements, such as those shown in case studies above, require specialized third-party assessment for a charge.

**What about long-term results?** TryMarine's gains are a function of improving conditions and creating stability in a waterbody ecosystem. With less muck and improved sediment conditions a strengthened ecosystem should regain its ability to process nutrients. Continued nutrient inflow may require low-level maintenance doses of TryMarine or other traditional management techniques, which should be more effective after TryMarine restoration.

**What if my lake doesn't respond as expected?** A small percentage of lakes respond more slowly due to system complexity. Instead of simply adding more product, treatment professionals will diagnose the causes and adjust treatment accordingly.

**How long has TryMarine been used?** The TryMarine formulation has been used and improved over the last decade. It has been the subject of numerous national, state and local test applications, academic studies and permit approvals. Recognized industry/academic leaders have studied and worked with TryMarine for more than 5 years.

**How does weather affect TryMarine?** Treatments are effective at water temperatures of 55°F and above. Normal weather doesn't affect efficacy, but extreme storms that impact water and nutrient flows may require dosage adjustments. Application schedules are tailored to avoid heavy weather and for the specific climate of your region.

**Do other treatments affect TryMarine?** Other traditional lake management strategies may be used in combination with TryMarine. Traditional treatments that have lost efficacy, may actually regain utility during and after TryMarine restoration. Check with a professional applicator before combining different technologies.

**I don't want any period of it looking worse before getting better - can you minimize the possibility of this?** Depending on goals and expectations, TryMarine dosages can be adjusted. If aesthetics or speed are a priority, an appropriate plan can be tailored. However, temporary aesthetic impacts cannot be fully ruled out during early treatment phases.

**What if my lake has unique challenges (e.g., invasive species, high sediment load)?** We love a good challenge! Many of our first projects in the USA were in water bodies where no other techniques were helping. We have many ways to tailor a treatment plan to your specific needs and desired outcomes.

**Can TryMarine be used in conjunction with other treatments (herbicides, aeration)?** Yes, TryMarine often works synergistically with other treatments to boost their effectiveness, but these other treatments may not be necessary for success.

**Is there a minimum or maximum lake size for effective treatment?** No - TryMarine does not require any infrastructure, it is scalable from the smallest backyard pond to large public water bodies. Larger water bodies can be treated in phases, or by section, if desired.

## TRYMARINE SAFETY PROFILE

TryMarine has undergone rigorous safety testing, for humans and aquatic species.

The Gold Standard for human safety in water is NSF 60 certification, attesting to its safety for use in drinking water applications; TryMarine was rated safe for use in drinking water up to 522 ppm (the typical dose is only 0.5-2 ppm).

Certified to  
NSF/ANSI/CAN 60

Toxicity testing on aquatic species, performed by EcoAnalysts following EPA protocols, shows no risk to the most sensitive species at levels well above typical doses of 0.5-2 ppm.

Recommend purchasing a playground system through Cunningham Recreation using the OMNIA partners purchasing contract #2017001134 to replace the current one at Stoneridge Park. Funds are available in Accounts 311.48311.780.51326 and 110.44300.922.

**Formal Body:**

The current playground at Stoneridge Park was installed in 1999 and is in need of replacement. Industry standards for playground replacement recommend a replacement timeline of 15-20 years. Best practices incorporate equity, usage, and condition scoring to develop replacement timelines for parks and recreation amenities.

Our recommendation is to purchase a playground system through Cunningham Recreation using the OMNIA partners purchasing contract #2017001134 to replace the current one at Stoneridge Park. The new playground system would provide accessible play options for children ages 2-12 years of age. Total cost of the new playground system installed is \$108,687.06.

Funds are available in Accounts 311.48311.780.51326 and 110.44300.922.

A. Section II – Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by:

1. Your acts or omissions; or

B. With respect to the insurance afforded to these additional insureds, the following additional exclusions apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

1. All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

2. That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declarations.

## GAMETIME POLICIES

**Specifications:** Specifications were current at the time of publication. GameTime has an ongoing policy of product improvement and therefore reserves the right to modify specifications or discontinue products without notice.

**Terms of sale:** To governmental agencies and tax supported institutions, and those with approved credit, payment is due 30 days from the date of invoice. A 1.5% per month finance charge will be imposed on all past due accounts. We also accept payment by VISA, MasterCard or American Express. All other orders will require a 50% deposit at time of order entry. The balance will be due with a certified check upon receipt of shipment (C.O.D.).

**Prices:** Prices are F.O.B. factory and do not include freight charges. All prices were current at time of publication and quoted in U.S. Funds. Prices are subject to change without notice. Current prices will apply at the time of shipment. Due to the abnormally high cost of fuel and its impact on many of the materials used in our industry, quotations are valid for 30 days only and prices may be subject to material and fuel surcharges at time of shipment.

**Freight charges:** Freight charges are determined and collected by the carrier unless GameTime is requested and agrees to prepay and add these costs to the invoice.

**Taxes:** If applicable, taxes will be added to the invoice except when a tax exempt certificate is provided with the purchase order at the time of order entry.

**Minimum Order:** Our minimum order is US \$50.00.

**Order cancellation:** Once accepted, orders can be canceled only with the consent of GameTime, and on terms which will indemnify GameTime against loss. Canceled orders will be subject to a restocking fee. Equipment "built-to-order" is non-cancelable.

**Domestic shipments:** Unless specifically given routing instructions on the purchase order, shipment will be made via the carrier we consider to be the most economical and practical in reaching the final destination.

**Delays in transit:** GameTime is not responsible for delays in transit and such delays shall not alter our invoicing terms.

**Loss or damage in transit:** GameTime is not responsible for loss or damage in transit. Carefully check all materials received; any shortage, discrepancy or damage must be noted on the delivery receipt and signed by the carriers representative. Failure to note exceptions on the delivery receipt may impair your right to recovery from the carrier.

**Weights:** All published weights are estimated and include appropriate packing materials. Actual weights may vary slightly.
