Department: Engineering

Category: Proposal

Prepared By: Dena Hathaway

Department Head: Rick McClanahan

Water production well pump improvements.

The City needs to brush the well casing screen, remove accumulated debris out of the base of the well casing and further inspection of the back pressure valve at the base to determine cement plug specifications. This pump has been in service since 1997 and a new motor was installed in 2015.

Layne-Central will be conducting the continued evaluation toward the repair:

Brush well casing, lap, and screen and jet fill from well	\$12,100.00
Perform downhole TV survey on well with sub pump	\$4,550.00
Install cement plug at bottom of well	\$8,900.00
TOTAL PROJECT COST	\$25,550.00

Please authorize \$25,550.00 for further base evaluation and brushing of the well casing from Account 510.51200.262.

**RE: GERMANTOWN ROAD PLANT
WELL#3 – PUMP S/N 117569**

Dear Greg,

Layne Christensen Company has recently pulled and run a TV survey on the above mentioned well. The video showed that the well casing, lap, and some of the screen indicate amounts of what looks like iron deposits on the pipe. There also appears to be about five feet of fill in the bottom of the well which also looks like iron deposits that have likely scaled off of the casing. The sand may be coming from the back pressure valve but it is hard to tell with the fill in the bottom of the well. We recommend brushing the well casing, lap, and screen and then jetting out all of the fill material. Once this is complete we need to run another TV survey with a submersible pump to see if we can see if the sand is actually coming through the back pressure valve at the bottom of the well. There does not appear to be any holes in the casing, lap, or screen that would be causing sand. If we determine that the sand is coming from the bottom of the back pressure valve we can install a cement plug at the bottom of the well. Our quote is as follows.

Brush well casing, lap, and screen and jet fill from well	\$12,100.00
Perform downhole TV survey on well with sub pump	\$ 4,550.00
Install cement plug at bottom of well	<u>\$ 8,900.00</u>
TOTAL PROJECT COST	\$25,550.00
